DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al (5,911,493).

3. Walker discloses the claimed invention except for the recitation of the light tubes having bubbles formed therein and being made of acrylic. Walker discloses raft(12) having a plurality of skeletons (16) connected to a top end thereof each skeleton being connected with one end of a side rod another end of the side rod being connected to the raft(14); a cloth spreading on the skeletons of the raft with sleeves formed at the edges (inherent)and characterized by the raft comprising a hook fixtures secured to on the skeletons(22) of the raft each fixture comprising a hole and a clip (30)at the bottom end thereof light tubes secure to the clip(figs 1-2)s of the fixtures each light tube comprising a light emitting diode at one end therein each tube(24) having a power cord which will be formed in a bundle of an electric wire(26) by collecting all power cords of the light tubes another end of the electric wire being formed with a plug a power supply hanged on the hook of the raft the power supply comprising a socket and a stud near the end (col. 1 lines 20-26).With regards to the light tubes being formed of acrylic and having bubbles formed therein, it would have been obvious to one of ordinary skill in the art at

the time the invention was made to provide the device of Walker with such a decorative embodiment since, it has been held that that matters relating to ornamentation only which have no mechanical function cannot be relied upon to patentably distinguish the claimed invention from the prior art. *In re Seid* , 161 F.2d 229, 73 USPQ 431 (CCPA 1947).
